Bay Area Housing and Community Multiple Hazards Risk Assessment

Dana Brechwald, Earthquake and Hazards Specialist, Association of Bay Area Governments
Housing as Keystone to Resilience
Key Issues lead to targeted strategies

Housing Issues: Building codes life safety only, Liquefaction damages foundations, Ground shaking damages homes.
Community Issues: Residents resource constrained, Housing affordability issues, Limited hazard information.
Challenges: Low-income residents can’t shelter in place, People can’t afford new housing, People don’t retrofit.
Strategies: Improve building codes, Encourage hazard insurance, Develop retrofit programs.
