ECONOMIC
Revitalise greater Christchurch as the heart of a prosperous region for business, work, education, and increased investment in new activities.

SOCIAL
Strengthen community resilience, safety and wellbeing, and enhance quality of life for residents and visitors.

BUILT
Develop resilient, cost effective, accessible and integrated infrastructure, buildings, housing and transport networks.

COMMUNITY

CULTURAL
Renew greater Christchurch’s unique identity and its vitality expressed through sport, recreation, art, history, heritage and traditions.

NATURAL
Restore the natural environment to support biodiversity and economic prosperity and to reconnect people to the rivers, wetlands and Port Hills.

CERA, the public and private sector and communities coordinate with each other to contribute to the recovery and future growth of greater Christchurch.

Registry opening marks progress for Arts Centre restoration

The recent opening of the fully restored Registry building marks an important milestone in a long journey to restore the iconic central city Arts Centre.

The circa 1916 building on the Montreal Street/Worcester Boulevard corner was damaged in the February 2011 earthquake and partially collapsed. It’s been reinforced and restored, and was opened up briefly for public inspection on 7 July. The Registry is the first to be restored of 22 earthquake-damaged buildings on the site.

Chief Executive Andre Lovatt says it is only a small part of the site but a big thing for the Arts Centre.

“We’ve got a good plan and we are just getting on with doing our plan. We are conscious there are other things going on in the city but I want people to know we’re serious and making progress.”

Recruitment and consultancy company Brannigans will occupy the Registry upstairs, while negotiations continue for the downstairs space.

The next step in the restoration of the Arts Centre will be completing the Gymnasium building, formerly home to the Academy Cinema, which is scheduled for December.

The Arts Centre will also come to life later this month when the Market Square is transformed into the Fletcher Building Festival Club as part of the 2013 Christchurch Arts Festival (22 August to 22 September 2013). The purpose-built temporary venue will host more than 50 events, from music and theatre to circus and cabaret performances. For more information go to: www.artsfestival.co.nz

Locals check out the restored and refurbished Arts Centre Registry building.
Recycled Ellerslie gardens to brighten the empty spaces of New Brighton

Rescued red-zoned plants will take on another lease of life beautifying empty spaces in the Christchurch suburb of New Brighton.

The plants have been harvested by landscape gardener and former NRL player Scott Fletcher. He’s been using his skills and experience to help friends and neighbours in Sumner retrieve favourite plants from their red-zoned properties. This is in cases where it is safe and permitted to do so and prior to the property owners’ settlement dates with the Crown. In exchange, he has the owners’ permission to salvage left-over plants.

Scott Fletcher built these plants into his Silver-medal winning garden at this year’s Ellerslie International Flower Show. But that isn’t the end of their journey. He’s now going to donate them to the New Brighton Business and Landowners Association to decorate some of the area’s empty spaces.

“I will do some [landscape] design work for them, and plants from my Ellerslie entry will go in there, as well as some others from red-zoned properties. It is just great to see them given yet another new lease on life,” says Mr Fletcher.

It isn’t just Scott Fletcher’s Ellerslie International Flower Show entry that will be used to beautify New Brighton. Ben Hoyle, who won a Gold medal for his entry A French Kiss in Akaroa, has also donated some of its features. Its physical structure will liven up an empty space, as will some of its plants.

“I am thrilled to see it taken and adapted to suit the needs of the community. It’s not designed to be a permanent structure but if it provides pleasure for a few months, that’s great,” says Ben Hoyle.

Christchurch Garden City Trust presents

The Garden City Gorgeous

16 Feb - 3 Mar 2013
Further Avon River Precinct plans revealed

The Terraces Concept Plan

Key
- Existing buildings, structures or landscape settings retained and/or enhanced
- New safer pedestrian crossings for the promenade.
- Friendship Corner: a series of grassed terraces will create an informal amphitheatre for performance and events.

11. Cycle path (two-way): The segregated cycle path runs along the margin between Cambridge Terrace and the Park of Remembrance and links to a continuous cycle route through the city.

12. Park of Remembrance: retained as a 'soft', informal park space and place of remembrance.

13. Smaller river-edge terraces provide access down to the water's edge and areas of informal seating.

Concept designs have been released for the next stage of Te Papa Ōtākaro/Avon River Precinct, which will be called The Terraces.

This Wellbeing site is intended to provide improved access to local support services across Christchurch – post earthquake.
Repairing communities, not just buildings

When community organisation Project Esther lost its Spreydon headquarters to arson late last year, its mission to support people struggling in the community became that much more challenging – until it got a helping hand from Buildtech, a family building company with strong Canterbury roots.

Project Esther is a charitable trust, based with the South-West Baptist church, that works with women and families in need. Its wide range of support services include practical help for single mothers, parenting education, a preschool music and movement case, a drop-in centre with a computer available, and emergency accommodation. It also provides support for the chaplaincy at Christchurch Women’s Prison.

“We’re well utilised,” says Project Esther Manager Dachne Marsden. “We work with hundreds and hundreds of families.”

On 24 December 2012, the trust’s building was destroyed by an arsonist. Overnight they lost their offices and a drop-in centre, as well as resources built over 19 years.

A few of the Buildtech crew – happy to help out in the community.

The workers were divided up into shifts and worked a paid day. – Israel Cooper says since the earthquake they’ve had to
